CY

Dear All,

Thanks for those who had joined the online seminar for planning applications last Friday. Due to technological problem of the online meeting platform, the audio quality was very poor, and many participants are unable to hear my voice. I have therefore searched for a new online meeting platform during the weekend and had successful found a replacement. I am able to record the presentation with good video quality of the slides and clear audio quality of my voice.

I could assure you the quality of the recorded presentation together with the good content won't disappoint you. Kindly refer to the below recorded presentation and the PowerPoint slides for your reference. I have also recorded a previous presentation on the topic of neighbourhood planning. You are welcome to share them among councillors and colleagues.

Recorded presentation for planning applications:

<https://vimeo.com/409639973>

PowerPoint Slides for planning applications:

(please click the download button to download)

Hope you would find the information useful. Thank you.

Regarding neighbourhood planning, if you would like us to be your neighbourhood planning advisor, please feel free to let me know.

We could set up an online meeting to discuss. Of course, after the passing of the current COVID-19 situation, I could meet your neighbourhood planning steering group at your parish/town council office.

Please also keep us updated of any change or progress of your local plans and neighbourhood plans so that we could serve parish councils in your county with the best of our knowledge. Thank you.

Best,

Clara Yeung
